

FABIAN OROPEZA

PERSONAL PROFILE

Communications and Electronics Engineer with hands-on experience in Quality Assurance and testing across leading tech companies. Skilled in Agile methodologies, test case execution, defect tracking, and technical support. Recently completed a Project Management (PMI-based) diploma to transition into roles involving project coordination and cross-functional leadership. Passionate about continuous improvement, problem-solving, and driving high-quality outcomes in technical environments.

WORK EXPERIENCE

TEST ENGINEER - QUALITY ASSURANCE

MOTS (Feb 2022 - Present)

- Analyzed end-user requirements to define and document comprehensive Test Plans and execution strategies.
- Executed complex test cases, performed debug sessions, and followed up on defects using ALM, JIRA & Bugzilla.
- Led QA efforts for the homologation of 20+ projects, from pre-testing to final approval.
- Delivered technical customer support, improving response time through the effective use of communication tools (Slack, Outlook, TeamTalk, WeChat).
- Reduced the occurrence of critical bugs by implementing risk-based testing, early regression testing, and customer-driven validation processes.
- Produced high-quality reports and documentation in alignment with ISO 9001 standards.

JUNIOR TEST ENGINEER

FOXCONN (Mar 2021 - Feb 2022)

- Performed Hardware + Software systems testing for rack servers, ensuring compliance with global quality standards.
- Developed and executed stress testing scripts in Linux to validate high-load performance.
- Communicated project goals and testing progress effectively with internal teams and stakeholders.
- Performed functional and compliance testing in accordance with customer requirements, improving delivery accuracy.

TEST TECHNICIAN

FLEXTRONICS (Aug 2020 - Feb 2021)

- Developed and optimized layouts for AXI and AOI programs to enhance defect detection accuracy.
- Performed installation, calibration, and preventive maintenance of AXI and AOI equipment, ensuring consistent testing quality.
- Ensured testing environment stability through precise calibration and preventive maintenance of high-volume inspection equipment (AOI/AXI)
- Collaborated with cross-functional teams to ensure inspection processes met stringent industry standards and customer specifications.

SKILLS SUMMARY

▼ QA & Test Tools:

- Test case creation & execution
- Bugzilla, JIRA, ALM, TestRail, Noah
- Regression, Sanity & Risk-based testing
- Manual & API Testing
- ISTQB Knowledge

▼ Programming & Scripting:

- Python, Bash Scripting
- ADB & AT Commands
- Basic GIT

▼ Project & Process:

- Scrum / Agile methodology
- PMI Method
- Problem-solving
- Strong communication & cross-team collaboration

▼ Systems & Networks:

- Networking tech (5G, LTE, 3G, 2G)
- Advanced Windows & Linux-based OS administration, Microsoft Office
- Wireshark, QXDM, Logel, ELT trace tools

EDUCATION

PROJECT MANAGEMENT (PMI METHOD)

ITESO - 2024

- Key Topics:
 - Project Initiation
 - Risk Management
 - Agile Planning
 - Cost & Schedule Control

UNIVERSIDAD DE GUADALAJARA - CUCEI

B.S. in Communications and Electronics (2016-2021)

LANGUAGE

- Native Spanish
- Fluent English
